December 12, 2016

We would like to start this letter with the words of the kindest regards and gratitude for your time and interest. It's no secret that Ukraine takes one of the leading IT positions in the world. As the matter of fact Ukraine is holding the 4th place worldwide with more than 250 000 IT specialists all over the country, among them **50 000 certified IT specialists** and **30 000 IT graduates annually**. Please take into your consideration that these numbers are constantly growing. Due to the economic and domestic situations in the country for the past 25 years, the life level remains at the mark where there are interesting possibilities are opened for the IT market. The average salary is still one of the lowest in Europe, however the IT salaries allow the specialists to stay in the country and spend, invest money while raising Ukrainian domestic economy.

According to the **IAOP** rating Ukraine is taking one of the leading positions in the **Global Outsourcing 100** with offices and financial assets of such companies as **EPAM, Ciklum, Luxoft, Intetics, Softjourn** and **Team International Services**. The main criterias that have been used in compiling the list are: the size and pace of the company growth, the quality of the services, innovation and corporate social responsibility. Nowadays we can observe a few mainstreams in the outsourcing and outstaffing in Ukraine. They are: customer internet services, including online media, e-commerce, software including cloud services, enterprise, consumer and mobile integrators. Also mobile technologies, applications and gaming. According to the **Forbes** publications, such companies as **Samsung Electronics, NetCracker, Aricent, SysIQ, Wargaming, Siemens, Magento, Sitecore, Playtech, Huawei, Crytek** and many others fill themselves comfortable and safe dealing with Ukrainian outsourcing and outstaffing companies, at the same time satisfying their needs in technical support, software development and testing, business process, data entry services, system administration, mobile applications development, financial and security back offices. And it is not only about saving funds and making any business sector much more profitable, it is also about high level qualified specialists with market experience and skills.

Worldwide well-known companies from the list such as: **TradeBridge, HealthBridge, DCM, Landis+Gyr, FNDS 3000 Corp, Visotronix Gaming, Sable, EveryZ, Aweb, InfoSoft, iTEAM international, eFisco, SoftKey, Gameloft** and **Global IT** prefer to outsource and outstaff their IT needs to the Ukrainian specialists.

Ukraine's IT outsourcing market has become the most attractive destination in Eastern Europe. Outsourcing to Ukraine and the collaboration are facilitated by our geographical

and cultural proximity to Europe. All these factors ensure an easy and trouble-free cooperation of Ukrainian software developing companies with their customers from all over the world. We have more than 880 universities, colleges and technical schools. Imagine 670,000 students with technical specialization graduating each year and 30 000 of them are in the IT field. So we have got a growing developing economic and industrial base due to solid fundamental technical education and the rapidly growing Ukraine outsource market.

Here in Ukraine over 50 000 experts are employed in the Information Technology industry. This abundance of available IT specialists allows us to keep up with the most rigorous demands of IT management and product development standards. Today Ukraine is a really well-formed and mature software development hub of highly demanded and skilled developers.

At Garuda - Invest we provide full range of software development outsourcing and outstaffing services. Our innovative and quality approach allows us to create effective software development solutions for both local and international markets. Garuda - Invest is able to create software solutions using variety of technologies ranging from web applications, 2- and 3-tier system and kernel mode, and desktop applications that are used in industries such as **Healthcare, Insurance, Public Utilities, Financial Services, Banking, Digital Entertainment, Gaming, Gambling, Betting and Mining.**

Our software implementation process includes complete design and development of custom software applications, quality assurance, software deployment, and further maintenance and improvement. The dedicated team of highly professional **QA specialists** uses a wide range of comprehensive testing methods and tools to ensure that we deliver fully functional and reliable solutions. We successfully solve tasks of any complexity, from manual testing to test automation by applying traditional development processes as well as **Agile methodology.**

At Garuda - Invest we offer manual and automated **Quality Assurance services** on multiple platforms and perform complex testing of software functionality and performance. We offer mobile application development services that enable our clients to increase their visibility on the Web and mobile, boost productivity and get instant access to real-time data and existing system.

Hope that you find this information useful and interesting.

Sincerely,  
Igor Mykhasko
